SECURITY CARD

Presentation and rules of edition corresponding to the European Directive 91/155/EEC

---

1. IDENTIFICATION OF THE PRODUCT AND THE COMPANY:

Commercial name: **DESCALENT AGENT FOR MACERATOR**

Types of use: WC CLEANING

Supplier: **SFA**
8, rue d' Aboukir
75018 PARIS
Phone: 0810 05 90 02 (AFTER-SALE DEPT)

---

2. COMPOSITION / INFORMATION ON CONSTITUENTS (COMPONENTS):

Chemical nature of the product:
FRAGRANT AQUEOUS SOLUTION CONTAINING PHOSPHORIC ACID

Component contributing to the danger:
PHOSPHORIC ACID

---

3. IDENTIFICATION OF THE DANGERS:

This descaling agent is a not dangerous product, however, given the presence of PHOSPHORIC ACID diluted in the product, this one can have an irritating action for the skin and the eye mucous membranes. The risk of irritation of respiratory tracts is small.

---

4. FIRST AIDS:

Contact with eyes: wash toroughly with clear water or salty water for 15minutes. If the irritation persists, consult an ophtalmologist.

Ingestion: do not make vomit. Call an emergency doctor and show him(her) the label of the product.

---

5. MEASURES AGAINST FIRE:

Particular dangers of fire or explosion: incombustible and non-explosive product. Under the influence of the heat, a risk of emissions of acid smokes (oxide of phosphor) exists.

Means of extinction: powder, foam, dioxide of carbon.

Particular measures of protection against fire: anti-acid equipment.

6. MEASURE IN CASE OF ACCIDENTAL DISPERSAL:

Avoid the spreading of the product in sewage system or in streams. Pump the spreading liquid in a reserve tank, otherwise absorb it with some sand. Consult a specialist about the destination of the got back product.

7. MANIPULATION AND STOCKING:

Precautions in the course of manipulation: avoid the contact with the skin and the eyes.

Precautions in the course of stocking: stocking in well ventilated locations, on a waterproof ground, protected from the light and from the heat, and far from any metal object.

Materials of packaging or bottling*:* polyethylene. 5 liter tins.

Special measure of protection: foresee water stations near the places of manipulation, showers and eye fountains.

8. CONTROL OF THE INDIVIDUAL EXHIBITION / PROTECTION:

Port of gloves and safety glasses is recommended during the manipulation of the pure product.

9. PHYSICAL AND CHEMICAL PROPERTIES:

Physical state at 20°c: **LIQUID**

Colour: **BLUE**
Smell: **LAVENDER**

PH - in the state of delivery: **< in 2**
Density at 20°c: 1,075
Solubility in the water: **SOLUBLE**

10. STABILITY AND ABILITY TO REACT:

Dangerous reactions with: lime, nitrates, chlorates.

Dangerous products of decomposition: formation of hydrogen in the presence of numerous metals.

11. TOXIC INFORMATION :

Ingestion: can cause burns, sicknesses, vomits and diarrhea.
Contact with the skin: can cause a temporary local irritation of the skin.
Contact with eyes: can cause an irritation of eyes.

12. ECOLOGICAL INFORMATION:

Neutralization of the product in pH 7 +/-1,5 before any discharge in the sewage system.

13. CONSIDERATIONS RELATIVE TO THE ELIMINATION:

Do not reject the product to the sewage system or in streams. Neutralize the product with an alkaline carbonate, then wash abundantly in water. Destruction of packaging soiled by wash in the water and neutralization of waste water.

14. INFORMATION RELATIVE TO THE TRANSPORT:

This product presents no risk and does not thus make the object of any particular rule.
N° UNO : not applicable
ADR / RID : not applicable
N° IMDG : not applicable
